

## Product data sheet HC Classic White and Black Heaters with steel front

### Properties

- Approved by Intertek
- IP24 protection. Can be used in bathroom and wet rooms
- Meets the requirements of Ecodesign 2015/1188
- Open window function
- Class I - grounded
- Electronic thermostat
- Switch: 1-pol Off/On
- Electronic thermostat: From +1 to +35 °C
- Thermostat accuracy: +/- 0,2 °C at 20 °C
- After power outage the heater will use standby
- Thermal fuse against overheating
- Height: 43,5 cm
- Colour: Matt black and white
- 1,5-meter white / black cable with plug
- For use with voltage: 220V – 240V AC 50-60Hz
- Safety distance:
  - Below: 15 cm.
  - Above: 30 cm.
  - Sideways: 10 cm.
  - Front: Do not cover

### Description of Beha HC Classic heaters

Convector heaters with electronic thermostat provide a stable temperature. These heaters are intended for basic heating and are equipped with built-in weekly program and a program which can be customized.

After power outage the heater will be in standby modus. When the heater is switched on again, it uses the comfort temperature that has been set.

The heaters have an open window detection. If the temperature in the room drops several degrees within a few minutes the open window function is activated automatically. The function is active for a maximum 60 minutes.

The open window functions can also be activated manually. When switched on, the heater returns to the programme.
